

## Designs For Learning, Model Paper / Template [Title, Subtitle]

By LEADAUTHOR <sup>1</sup>, & SECOND AUTHOR [If several divided by colon]  
*Affiliation Organisation, Town, Country [If several divided place on separate lines and mark appropriate author with superscript <sup>1</sup>]*

*This model paper contains important information about requirements, content and process of submission for the Designs for Learning Conference. This extended abstract contains information about formatting requirements, but do not name font size etc., as we expect you to use this document as template. Begin with a maximum of 5 lines short introduction in Italic.*

**Keywords:** up to 5 keywords

### REQUIREMENTS [HEADING]

The maximum paper length is 5.000 characters incl. spaces and a maximum of 3 pages including figures, tables and pictures. Do *not* add any page numbers, headers or footers. The electronic proceeding of the conference is formatted on A4 paper.

Headings are capitalised and centralised on the page and can be used, though keep in mind this is an extended abstract (very short research paper), so use them scarcely. Do not number your headings and do not use any further levels of headings. You can apply bold and italics in the text as appropriate, but do not use other styles. Use normal capitalisation within the text and italics for emphasis (not bold).

Paragraphs are even justified, using indents on all paragraphs following a paragraph. I.e. paragraphs following headings, figures, and tables. Do *not* use endnotes or footnotes for these extended abstracts, but do provide a couple (1-4) of key references using the APA-style format. Please note, that if English is not your native language we recommend that you have your paper proofread by a fluent (preferably native). If you wish to make acknowledgements in your paper, these should appear immediately before the references at the end of the paper, using the heading: acknowledgements.

All figures, tables and pictures should be placed centred on the page, close to and following the description in the text. Figures should thus be referenced in the text and preferable preceding the figure placement and caption (see figure 1). Due to the copy edit, typesetting and press process, it may be necessary for us to shift images, but we try to keep the pictures where the authors have placed them.

Figure 1: This is an example figure and caption text

Linked diagrams and tables, inserted from other packages, cause particular problems when typesetting. PLEASE DO NOT DO THIS. Instead create an image in a format as listed above and insert this

## CONTENT, SUBMISSION, REVIEW AND PRESENTATION

The extended abstract should contain a description of: the research goal and the domain; the theoretical perspectives; the empirical foundation, and the research contribution. Some things that can be omitted in an extended abstract are, for example, future work, very specific details of tests, institutional information and ramifications that are not relevant to the key ideas of the abstract.

Submit the extended abstract to: [df12012@dpu.dk](mailto:df12012@dpu.dk), in a .doc or .docx format, where you clearly indicate in the subject and body of the e-mail which of the following category your submission belongs to: 1. Completed research projects; 2. Research and development projects under progress or 3. PhD projects.

The abstract will undergo an editorial review (not a double blind review) and we will return with information on whether or not your abstract has been accepted for presentation, prior to the deadline for early bird registration 10. January 2012. As soon as we know the number of accepted papers, we will prepare the final program, and let you know about your timeslot for the presentation.

**Important note on presentation and author relations:** As we in this conference aim at a very interactive environment, we aim at only having authors present one paper. Therefore if multiple abstracts are accepted for presentation different co-authors need to present each extended abstract. Presenter's registration must be completed 1 Month prior to the conference, and only abstracts with corresponding registered presenters are accepted for the electronic proceeding.
